

Tunstall

Freedom To Live Your Life

Leading the world with almost
70 years of global experience.

PERSONAL ALARMS | 24/7 MONITORING | ADVANCED TECHNOLOGY

Bridging The Gap In Community Care.

Modern retirement living is about balancing independence with safety. As more residents enter communities, the responsibilities of care teams increase.

Tunstall Healthcare is a partnership that is here to support staff and empower residents, without compromising dignity.

Our range of innovative products, like home and wearable personal alarms, mobile apps, fall detectors, activity monitors and environmental sensors are just the beginning.

We stand tall as an end-to-end solution for government, retirement villages and community care organisations, providing product development, installation, maintenance and 24/7 monitoring that sits discreetly in the background, only there when it is needed.

Supported Teams & Operational Efficiency

As an extension of onsite teams, our integrated Connected Care solutions reduce the manual workload on staff and establish structured escalation pathways for residents.

Reduce Risk

24/7 monitoring ensures that no call for help goes unanswered.

Continuity

Our Australasian-based monitoring centre ensures our life-saving service remains uninterrupted, even during technical outages or high-call periods.

Smart Escalation

We handle the initial triage, meaning your staff are only alerted when their specific onsite skills are required.

Funding Opportunities

Accessing Tunstall solutions is simple, with options including NDIS, Department of Veterans' Affairs, partner programs, or private purchase. Scan the QR code to find out more and understand how funding may support your needs.

Real people. Personalised care. Every hour of every day.

Technology is the tool, but people are the solution. Whether your residents are at home or out in the community, our 24/7 monitored solutions connect them to help instantly.

Operating from a model of autonomy, our devices are designed to be discreet and unobtrusive, aimed at preserve the lifestyle that residents love.

How the Tunstall monitoring service works.

1. Instant Connection

With a simple button press, a resident is connected to our 24/7 Customer Care Centre. No need to be near a phone, our powerful two-way voice units ensure they are heard.

2. Intelligent

Triage Our Care Consultants access the resident's tailored profile to determine the right help. That might be a neighbour, a family member, an onsite manager, or emergency services.

3. Human Support

We stay on the line until help arrives, providing reassurance while keeping family and care networks informed, should it be necessary for a resident to go to the hospital.

Trusted By Millions Worldwide

Since 1957, we've been pioneering Connected Care solutions. From humble beginnings to becoming a global leader, our mission remains unchanged: empowering independence through innovation.
