

Amie[®] Watch

What is it?

The AMIE[™] Watch is a stylish, wearable personal alarm that combines the reassurance of a monitored emergency alarm with the familiarity and convenience of a smartwatch.

Designed for people who want a discreet solution, the Amie Watch provides access to 24/7 emergency monitoring while supporting an active and independent lifestyle. Whether at home or out in the community, help is always within reach.

With its modern watch design, the Amie Watch offers confidence without looking or feeling like a traditional personal alarm.

Who is it for?

The Amie Watch is ideal for people who value independence and prefer a discreet, everyday wearable device.

It is particularly suited to:

- Older Australians who lead active and independent lives.
- Customers who prefer wearing a watch instead of a pendant.
- People wanting protection both at home and while out in the community.
- Individuals seeking a modern, discreet personal alarm solution.
- Families wanting the reassurance that their loved one can access help wherever they are.

How does it work?

The Amie Watch is worn like a regular wristwatch, providing continuous access to emergency assistance throughout the day.

If help is needed, the wearer simply presses the emergency button to connect with Tunstall's 24/7 Monitoring Centre. A trained operator can speak directly with the customer through the watch, assess the situation and coordinate the appropriate response, whether that's contacting a

family member, carer or emergency services. When away from home, built-in GPS technology helps identify the customer's location so assistance can be directed more efficiently when required.

When used at home, the Bluetooth Home Beacon helps optimise battery performance while maintaining the same simple user experience.

Features

SOS Alerting

SOS Alerting

Via SOS button or Automatic falls detection (if enabled)

Vibration for alerts to provide tactile feedback

Voice announcements to provide audible feedback

2-way speech

Ability to adjust fall sensitivity*

* Fall detection technology cannot detect all types of falls. Fall detection is an additional layer of protection, not a replacement for manual activation.

Improved Location Services

As well as GPS Amie™ uses Bluetooth/WiFi/LBS to improve the location services when GPS is not available.

Improved Home Battery Life

Amie™ comes with a Bluetooth-enabled magnetic charger. When in range of the charger Amie relies on the preset Bluetooth location therefore conserving battery.

User Fitness tracker

Step counter

Bluetooth Beacon

Specifications

Dimensions

46.9mm*41.7mm*15.4mm

Weight

53g

Battery

Rechargeable, 3.8v,600mAh

Battery Life

Up to 48hrs, dependent on usage, coverage and enabled features

Battery Life Expectancy

500 charging cycles. Note: battery will continue to function but with reduced performance

Charging Voltage

5V/DC 1.0.A

Only use the supplied charger, cable and power supply

Water Resistance

IP67

Can be worn in the shower but not submerged for more than 30mins

Locating Technologies

GPS/Bluetooth/WiFi/LBS

4G LTE

Multiple supported bands
